

NEW LIFE CENTER

A special place for expectant parents to bring their new babies into the world, these beautiful, home-like birthing suites allow mothers to labor, deliver and recover all in one area. Suites also include bath areas with Jacuzzi tubs. A newborn nursery and newborn care unit are available.

MEDICAL STAFF

Charles A. Cannon Jr. Memorial Hospital's medical staff represents a variety of specialties:

- emergency medicine
- cardiology
- family medicine
- orthopedics
- radiology
- psychiatry
- urology
- pediatrics
- physical therapy
- obstetrics
- pathology
- neurology
- general surgery
- internal medicine
- ophthalmology
- otolaryngology
- speech, occupational & other rehabilitation therapists

Our staff includes surgeons who perform a range of inpatient and outpatient procedures, ear, nose and throat procedures, and laparoscopic surgery.

SLOOP MEDICAL OFFICE PLAZA

Located next to the hospital, the Sloop Medical Office Plaza is home to various medical practices, including family, orthopedic, dental and eye services. It also includes a retail pharmacy on-site where patients can purchase prescriptions, medicines and durable medical equipment, and an outpatient lab with a wide range of services.

VOLUNTEERS

CHARLES A. CANNON, JR. MEMORIAL HOSPITAL

Our 25-bed critical access, 10-bed restorative care hospital combines all the facets of a state-of-the-art facility with a tradition of care that has been alive in Avery County for decades. For your convenience, a full-service cafeteria and gift shop are located within the facility.

PATIENT CARE CENTER

The main section of the hospital is dedicated to treating the ill and those requiring post-surgical care. Our Critical Care Unit provides patients with care for severe medical conditions such as stroke, heart attack and traumatic injury. Advanced medical equipment and a dedicated staff ensure patients a brief yet comfortable stay.

RESTORATIVE CARE UNIT

Patients needing rehabilitation services and skilled nursing care benefit from this 10-bed unit. The center treats vehicle accident victims, elderly patients who have suffered a fall, and stroke victims. While individuals usually remain longer in Restorative Care than on the regular nursing floor, physical therapists work closely with patients to speed recovery.

EMERGENCY DEPARTMENT

Emergency medicine physicians offer an advanced level of care 24 hours a day. The department treats a wide range of conditions from cardiac to orthopedic and pediatric emergencies, and is fully equipped with trauma and specialized treatment rooms. Air ambulance services are also available

SURGERY CENTER

The hospital offers a total spectrum of outpatient and inpatient surgical services. These include general, pediatric, cardiovascular, trauma, orthopedic, transplant, urologic, gynecologic, rehabilitation and plastic surgery.

PHYSICAL THERAPY DEPARTMENT

Cannon Memorial Hospital's physical therapy department helps patients recover safely with both outpatient and inpatient rehabilitation for orthopedic, neurological, stroke, amputation, spinal cord, muscular tears and strains, and balance deficits.

DIAGNOSTIC SERVICES

- MRI and CT scans
- digital fluoroscopy
- ultrasound
- X-ray
- EKG and EEG
- mammography
- nuclear medicine

These technologies allow physicians to diagnose illness or injury quickly for prompt treatment. An accredited lab helps support these services, and can send test results back to your doctor.

BEHAVIORAL HEALTH / PASSAGES

The Passages program offers outpatient behavioral health services, including individual and group counseling.

EXTENDED AND HOME HEALTH CARE

If patients need professional medical care outside the hospital, they can be referred to Sloop CAP/ Avery Home Care Services, which offers the Community Alternative Program and home health services.

SLEEP STUDY PROGRAM

There are over 50 types of sleep disorders. Fortunately, most are treatable after an accurate diagnosis. Our specialists have the experience, skill and advanced technology to evaluate and treat sleep disorders in both children and adults.

CARDIOPULMONARY REHABILITATION

This NC certified multi-intervention program that offers education, exercise, and support to patients with Coronary Artery Disease (CAD) and Chronic Obstructive Pulmonary Disease (COPD).
