NAME OF

PATIENT CARE SERVICES

ORIENTATION/COMPETENCY INVENTORY (OCI)

Registered Nurse, Nursery (1-37)

During orientation, you will be required to validate with your preceptor, administrative supervisor and/or department director established competencies for the above referenced position through either return demonstration or verbalizing the procedure, skill or criteria. Your preceptor, administrative supervisor and/or department director will date and initial each competency as they are satisfactorily completed. **THIS OCI MUST BE COMPLETED BEFORE YOU CAN BE RELEASED FROM ORIENTATION AND WORK WITHOUT A PRECEPTOR.** (Based on individual circumstances an employee may be released prior to completion of the OCI due to lack of opportunity for return demonstration. However, that procedure, skill or criteria may not be performed independently by the employee until s/he has been evaluated by the appropriate individual). At the conclusion of your orientation this OCI should be fully completed and will be reviewed by yourself, your preceptor and department director. This OCI will become a part of your Human Resources file.

Date of Hire:

	<i>Bute</i> of time.

SELF- ASSESSMENT (Orientee Initials)			COMPETENCIES The orientee will be able to:	VALIDATION (Preceptor, Administrative Supervisor, Department Director, Date and Initials)		
0	1	2		RD	\mathbf{V}	NA
			1. Hospital Safety Procedures:			
			a. Internal Disaster (Fire [including RACE] &			
			Electrical Safety, Bomb Threat).			
			b. External Disaster (Emergency Preparedness).			
			c. Infection Control: Bloodborne Pathogens			
			and Tuberculosis Exposure Control Plans.			
			d. Body Mechanics.			
			e. Domestic Violence/Reporting of Suspected			
	1		Abuse.			
			f. Risk management (including Hazardous			
			Materials, MSDS).			
	1		g. Radiation Safety.			
	-		h. Patient call system.			
	-		i. Code Blue Management.			
	1		j. Current BLS-Healthcare Provider.			
			k. Current NRP-Healthcare Provider.			
			2. Departmental Overview:			
			a. Tour of department(s)/unit(s):			
			1) Patient room/bed numbers.			
	1		2) Location of waiting rooms.3) Location of conference rooms.			
			4) Medication carts.			
			5) Linen closets.			
	1		,			
	1		6) Utility rooms: Clean and soiled.7) Examining rooms.			
	+		8) Supply room: Charging, ordering,		+	
			obtaining.			
	+		9) Location of emergency equipment.			
			10) Charting areas.			
	†		b. Mechanism for tracking time and attendance			
			(Kronos).			
	1		c. Telephone system; etiquette.			
	1		d. Page operators; beepers.			
			e. Departmental staff meetings.			
	1		f. Standard of professional attire.			
	1		h. Role of the resource nurse.			
	†		i. Ethics committee role and access.			

SELF- ASSESSMENT (Orientee Initials)		ENT	COMPETENCIES The orientee will be able to:	(Preception (Preception))	ALIDATIO ptor, Admin r, Departme ate and Initi	istrative ent Director,
0	1	2		RD	V	NA
			3. Management of Information:			
			a. Maintenance of infant records.			
			b. Confidentiality; facsimile of information.			
			c. Nursery History and Assessment.			
			d. Doctor's Order Sheets.			
			e. Flow Sheet.			
			f. Nursing Progress Notes.			
			g. Footprint Sheets.			
			h. Laboratory Slips (bloodbank, hematology,			
			chemistry, microbiology, blood gas).			
			i. PKU Slips.			
			j. Crib Cards.			
			k. Day Book.			
			l. Birth Record Book.			
			m. Transfer Form. (nursing)			
			n. Hospital/departmental manuals:			
			1) Administrative.			
			2) Patient Care Standards.			
			3) Human Resources.			
			4) Infection Control.			
			o. Shift change Reporting system.			
			p Methods of assignments			
			q. Use of SMS/MEDITECH computer system.			

	SELF- SESSMI entee In	ENT	COMPETENCIES The orientee will be able to:	VALIDATION (Preceptor, Administrative Supervisor, Department Director, Date and Initials)		
0	1	2		RD	V	NA
			4. Physiologic Assessment: a. General: Recognize initial transition phases related to adaptation to extrauterine life. Accurately obtain weight, length, head and chest circumference, abdominal girth to establish baseline.			
			b. Skin: Recognize normal/abnormal turgor, texture, color, temperature, presence of rashes, acrocyanosis, mottling, birthmarks, presence of vernix or lanugo, desquamation, milia, Mongolian spots, jaundice. Able to obtain temperature (rectal, axillary) correctly.			
			 c. <u>Respiratory</u>: Assesses rate, rhythm, breath sounds, depth and symmetry. d. <u>Cardiovascular</u>: Assess cardiac rhythm and rate. Assess pulses, capillary refill, and 			
			general color. e. Abdomen: Assess size, symmetry, umbilical stump (vessels), tone, presence of bowel sounds. Able to obtain and assess gastric aspirate.			
			f. <u>Buttocks/Anus</u> : Assess symmetry, patency, notes passage of meconium. g. <u>Genitourinary</u> : Assess genitalia, and voiding.			
			h. Neurosensory: Assess tone, posture, and reflexes. i. Head: Assess symmetry, presence of			
			molding, cephalohematoma, caput, and fontanels. j. Eyes: Assess general appearance, symmetry, color of sclera and conjunctiva.			
			k. <u>Ears</u> : Assess symmetry, presence of tags, sinuses or clefts.			
			l. Nose: Assess shape, size, symmetry, patency of nares. Able to pass feeding tube nasally.			
			m. Mouth: Assess symmetry of lips, color, placement, size, and palate.			

n. Neck: Assess free movement of the head, skin folds present with no webbing. o. Chest: Assess shoulder symmetry, movement, and breast tissue. p. Spine: Assess symmetry, presence of dimples/sinus tracks. q. Extremities: Assess digits, symmetry, tone, creases, and pulses. r. Health History: Review prenatal record and delivery record. 5. Care of the Infant - Admission: a. Assemble appropriate equipment and assures functioning prior to use. b. Complete accurate physical assessment in accordance with policy and procedure. c. Infant's assignment to nursery is based on admission criteria. d. Appropriately notify the physician of infant's arrival. e. Recognize signs of maladaption to extrauterine life and reports to the physician in a timely manner. f. Delivers prophylactic medication in accordance with policy. g. Confirm a plan of care based on comprehensive review of admission assessment. h. Formulate a plan of care based on comprehensive review of initial infant assessment. i. Review/transcribe physician orders. j. Document information accurately. 6. Reassessment/Routine Infant Care: a. Review delivery history, initial infant assessment and physician orders. b. Initiate parental contact as soon as possible to determine routine care issues related to feasible to general and proving in circumcicion. 	SELF- ASSESSMENT (Orientee Initials)		COMPETENCIES The orientee will be able to:	(Prece Superviso	VALIDATIO ptor, Admir r, Departme ate and Init	nistrative ent Director,
0	1	2		RD	V	NA
			c. Provide parent(s) with report on infant's			
			condition. Furnishes parent(s) with rationale			
			of procedures/events to occur.			
			d. Accurately determine weight in accordance			
			to policy.			
			e. Assess sucking reflex with every feeding			
			noting deviations from expected outcomes.			
			f. Continue with the development/			
			implementation of plan of care based on infant's condition, assessment of parental			
			needs related to continued care while in			
			hospital and following discharge. Accurately			
			complete parental interview.			
			g. Accurately completes physical assessments			
			according to policy.			
			h. Assess factors that promote/ interfere with			
			appropriate parent infant bonding.			
			i. Assess and appropriately intervene to avert			
			complications.			
			j. Follow through with appropriate referrals as			
			indicated.			
			k. Appropriately alter/complete goals with			
			parent(s).			
			7. <u>Heelstick Blood Sampling</u> :			
			a. Verify physician order/protocol.			
			b. Prepare supplies needed to complete			
			procedure; utilize appropriate aseptic			
			technique related to universal precautions.			
			c. Select/cleanse appropriate site on lateral or medial plantar surface.			
			1			
			d. Grasp foot gently to control leg movement.e. Puncture skin with quick stabbing action.			
			f. Compress/release foot to facilitate flow of			
			blood.			
			g. Complete collection, apply pressure to site			
			until bleeding stops, apply sterile dressing.			
			h. Correctly label specimen and slips.			
			8. Security/Infant Abduction Prevention:			
			a. Verbalize understanding of need for			
			prevention of infant abduction.			

	SELF- ASSESSMENT (Orientee Initials)		ASSESSMENT		COMPETENCIES The orientee will be able to:	(Preco	VALIDATIO eptor, Admir or, Departmo Date and Init	nistrative ent Director,
0	1	2		RD	V	NA		
			b. Appropriately display employee identifying information and wears attire according to departmental policy.					
			c. Ensure infant transportation in bassinets only.					
			d. Ensure infant identification bands are present/secure.					
			e. Verbalize/demonstrate appropriate release of infant to mother once bands re-checked for accuracy.					
			f. Provide rationale/literature to mother/ significant other related to enhancing the security of the infant.					
			g. Demonstrate proper use of locked doors to unit and fire exits.					
			h. Verbalize procedures related to potential or actual infant abduction.					
			Demonstrate application of security sensor with proper documentation in accordance with hospital policy.					
			9. Medication Administration: a. Identify types of medications approved for administration by the nurse in the nursery.					
			b. Verbalize classification of specific drugs including side effects, dosage, and nursing implications.					
			c. Accurately calculate dosage/delivery rates.					
			d. Prepare, label and administers medications per physician orders/policy.					
			e. Correctly program infusion pump to prescribed rate.					
			f. Provide rationale to parent regarding use of medications.					
			g. Assess/monitor/document infant's response to therapy.					
			h. Report effectiveness/ineffectiveness and untoward effects to the physician.					
			i. Surfactant: Verbalize and demonstrate guidelines related to administration.

			10. <u>Thermal Stabilization</u> :			
			a. Verbalize understanding of elements that			
			contribute to establishing and maintaining a			
			neutral thermal environment for the neonate.			
			b. Prepare equipment prior to use and			
			maintains safe operation of same.			
			c. Place infant under servo-controlled radiant			
			warmer or in isolette; appropriately attaches			
			temperature lead.			
			d. Obtain baseline temperature reading.			
			e. Adjust controls as needed; set alarms.			
			f. Appropriately reassess/document temperature			
			of infant and environment per policy.			
			g. Observe/recognize symptoms/laboratory			
			values that may indicate temperature			
			instability.			
			h. Initiate/document actions to restore neutral			
			thermal environments.			
			i. Provide rationale to parent(s) regarding			
			thermo-control interventions used.			
			j. Instruct parent(s) regarding maintaining			
			thermal stability in hospital and at home.			
			k. Demonstrate appropriate interventions			
			related to weaning from warmer/isolette to			
			open crib.			_
			l. Assess infant's response to procedure/			
			documents outcomes.			
			11. Cardiac/Respiratory Monitoring:			
			a. Appropriately recognize need to institute			
			use of mechanical monitoring based on			
			accurate assessment, reporting to the			
			physician and physician orders.			
			b. Appropriately place leads.			
			c. Appropriately set high/low alarms.			
			d. Identify normal rates/rhythm and documents			
			based status of infant and physician orders.			
			e. Recognize deviations from normal rates/			
			rhythms and nursing interventions are			
			appropriate.			
			f. Document infant's response to interventions.

			need for equipment usage.			
			12. <u>Nasogastric Feedings</u> :			
			a. Verify physician order.			
			b. Prepare supplies needed to complete			
			procedure, utilize appropriate aseptic			
			technique related to universal precautions.			
			c. Determine size and maximum safe length of			
			catheter for insertion.			
			d. Properly position infant.			
			e. Insert tube into nostril/mouth to			
			predetermined placement mark (indwelling			
			tube may be present).			
			f. Ensure proper tube placement.			
			g. Aspirate air/residual formula, noting			
			character, reports/documents same.			
			h. Accurately measure abdominal girth and			
			assess tone prior to feeding.			
			i. Ensure proper temperature of formula/breast milk.			
			j. Appropriately deliver feeding per physician order via gravity/syringe pump.			
			k. Assess infant for tolerance of feeding,			
			possibility of reflux or aspiration resultant			
			from feeding, discontinues if necessary,			
			reports and documents same.			
			l. Provide rationale to parent(s) regarding need for feeding procedures.			
			13. Phototherapy:			
			a. Assess infant's color/physical status/lab			
			values related to the need for intervention.			
			Notify physician/transcribe orders, verify			
			presence of consent.			
			b. Prepare supplies needed to complete			
			procedure, utilizes appropriate aseptic			
			technique related to universal precautions.			
			c. Provide rationale to parent(s) regarding need for intervention.			
			d. Maintain a neutral thermal environment.			

	SELF- ASSESSMENT (Orientee Initials)		COMPETENCIES The orientee will be able to:	(Prece Superviso	VALIDATIO ptor, Admir r, Departmo ate and Init	nistrative ent Director,
0	1	2		RD	V	NA
			f. Position infant to allow maximum skin			
			exposure to optimize therapy.			
			g. Initiate/discontinue phototherapy per			
			physicians order.			
			h. Maintain accurate intake/output.			
			i. Assess infant's response to therapy,			
			collect/monitor results of bilirubin levels			
			and documents the same.			
			j. Recognize potential side effects of therapy			
			and initiate interventions as needed.			
			k. Include parent(s) in daily routines to			
			maximize bonding despite therapy.			
			l. Measure/adjust/record illumination.			
			m. Provide eye care every 3-4 hours.			
			n. Provide infant feedings per physician order.			
			14. Stabilization of Infant in Labor & Delivery:			
			a. Prepare/demonstrate necessary stabilization			
			equipment:			
			1) Infant radiant warmer.			
			2) Use of ISC probe and thermoregulation			
			principles.			
			3) Oxygen setup with correct size face			
			mask, Mapleson resuscitator, and			
			manometer. Verbalizes correct pressure			
			needed.			
			4) Suction setup with appropriate sized			
			catheter. Verbalizes correct suction			
			pressures.			
			5) Laryngoscope blades, stylets and endo-			
			tracheal tubes appropriately sized.			
			6) Meconium aspirator setup. Verbalizes			
			and demonstrates correct procedure.			
			7) Emergency medication and location.			
			b. Demonstrate correct technique of			
			implementing resuscitative or stabilization			
			measures.			
			c. Demonstrate/verbalize correct calculation			
			of emergency medications as per NRP			
			guidelines.			

	SELF- SESSMI entee In		COMPETENCIES The orientee will be able to:	(Prece Superviso	VALIDATIO ptor, Admin or, Departme ate and Init	nistrative ent Director,
0	1	2		RD	V	NA
			d. Demonstrates ability to bag/mask infant until			
			further measures are initiated.			
			e. Demonstrate ability to assist the physician			
			with intubation and stabilization of tube			
			placement.			
			f. Demonstrates bag-valve mask/ET tube			
			ventilation of infant.			
			g. Demonstrate/verbalize use of the transport			
			isolette.			
			15. <u>Stabilization of Infant in Nursery</u> :			
			a. Initial Stabilization:			
			1. Check equipment prior to infant arrival,			
			including code cart, and emergency medications.			
			2. Weigh infant, place under radiant warmer, attaches ISC probe.			
			3. Prepare and demonstrate use of pulse			
			oximeter and cardiac monitor; sets alarm			
			limits.			
			4. Initiate infant assessment, flow sheets and			
			plan of care.			
			5. Verbalize/demonstrate administration and			
			correct dosage of routine admission			
			medications; Vitamin K, Erythromycin,			
			Hepatitis B Vaccine when indicated.			
			6. Perform capillary blood glucose testing			
			using proper technique.			
			b. If peripheral I.V. is needed:			
			1) Understand/verbalize rationale for use.			
			2) Assemble necessary equipment and			
			supplies.			
			3) Display correct technique for inserting			
			I.V. catheter in accordance with hospital			
			policy.			
			4) Prepare I.V. fluids or bolus as per			
			physician order and demonstrates correct			
			technique for primary tubing and cassette.			
			5) Document solutions or bolus and insertion			
			site correctly.			
			6) Maintain I.V. certification.			

	SELF- ASSESSMENT (Orientee Initials)		COMPETENCIES The orientee will be able to:	VALIDATION (Preceptor, Administrative Supervisor, Department Director Date and Initials)		
0	1	2		RD	V	NA
			c. If umbilical catheter is to be placed:1) Ensure that consent or administrative guidance is obtained and verifies physician order is in the medical record.			
			Assemble necessary equipment and supplies.			
			3) Position infant appropriately for procedure, checks that cardiac monitor and pulse oximeter are functioning.			
			 Assist medical staff with procedure. Verbalize/demonstrate proper steps. 			
			Correctly notify radiology to ascertain line placement.			
			 Interpret radiology orders and is able to maintain infant prior to line placement verification. 			
			7) Prepare umbilical vein and artery solutions as ordered.			
			8) Assist the physician with securing lines.			
			 Demonstrate attachment of transducer, line calibration and zero adjust on cardiac monitor. 			
			10) Document procedure tolerance and solutions appropriately.			
			11) Verbalize/demonstrate correct blood sampling from UA or UV line if indicated and ordered.			
			 Demonstrate/verbalize location and preparation of items for UA insertion. 			
			d. If oxygen therapy is needed:1) Properly notify respiratory care department.			
			2) Demonstrate/verbalize understanding use of:a) Manometer and correct pressures.b) Use of suction equipment, correct			
			setup, catheter size and pressure. c) Bag-valve mask ventilation.			
			d) Bag/endotracheal tube ventilation.e) Oxyhood setup with analyzer.			

SELF- ASSESSMENT (Orientee Initials)			COMPETENCIES The orientee will be able to:	VALIDATION (Preceptor, Administrative Supervisor, Department Director, Date and Initials)		
0	1	2		RD	\mathbf{V}	NA
			f) Ventilator mechanics.			
			g) Taping and stabilizing ET tube.			
			h) Indications and setup of nasal CPAP			
			and cannula.			
			i) Procedure for obtaining ABG/CBC.			
			16. Transfer of Infant to a NICU/IICN:			
			a. Ensure that physician has obtained consent			
			for transfer .			
			b. Obtain physician order for transport.			
			c. Complete all necessary and urgent			
			procedures, treatments, and charting prior to			
			transport.			
			d. Notify administrative supervisor.			
			e. Obtain copy of infant's records.			
			f. Affix one infant identification			
			bracelet to glossy identification footprint form. Document transfer of infant on form.			
			g. Complete nursing transfer summary.			
			h. Demonstrate ability to verbally report to			
			receiving facility. i. Present transport team with a concise report			
			and assist if indicated.			
			j. Demonstrate ability to jointly identify the			
			infant with the transport nurse and documents			
			appropriately.			
			k. Document appropriate information in patient			
			transfer log.			
			17. Infant of Drug Addicted Mothers:			
			a. Obtain results of maternal drug screen,			
			b. If positive, demonstrate/verbalize protocol			
			steps including:			
			1) Social service consult.			
			2) Signs and symptoms of withdrawal.			
			3) Indications to initiate neonatal addiction			
			score (NAS).			
			4) Notification to the physician.			

SELF- ASSESSMENT (Orientee Initials)			COMPETENCIES The orientee will be able to:	VALIDATION (Preceptor, Administrative Supervisor, Department Director, Date and Initials)		
0	1	2		RD	\mathbf{V}	NA
			c. If no maternal drug screen was sent on mother with a positive history:			
			1) Demonstrate method of obtaining infant			
			urine drug screen.			
			2) Social service consult.			
			3) Notification to the physician.			
			4) Treatment of infant as indicated.			
			18. <u>Infant with Suspected Sepsis</u> :			
			a. Locate protocol and can verbalize necessary			
			necessary indications for treatment.			
			b. Locate and verbalize pertinent maternal			
			history obtained from labor & delivery			
			summary, along with antibiotic			
			intervention.			
			c. Perform heelstick correctly to obtain CBC			
			and blood culture.			
			d. Correctly complete lab requisition, label			
			and places call to patient escort.			
			e. Document when specimens are obtained,			
			results and physician notification.			
			f. Verbalize what to look for during 48 hour			
			observation period and interventions, if			
			appropriate. g. Assist physician/designee in obtaining			
			central blood specimens or further tests.			
			h. Correctly initiate peripheral access and			
			document procedure.			
			19. Infant Feeding/Nutrition:			
			a. Identify correct patient and review patient			
			orders.			
			b. Identify feeding status (NPO, nipple,			
			breastfeeding).			
			c. Review medical record for information on			
			tolerance of previous feedings.			
			d. Identify correct feeding time(s).			
			e. Measure abdominal girth.			
			f. Assess bowel sounds.			
			g. Obtain blood glucose, as appropriate.			
			h. Identify correct type and amount of feed.			

Orientation/Competency Inventory (OCI) Registered Nurse, Nursery

SELF- ASSESSMENT (Orientee Initials)			COMPETENCIES The orientee will be able to:	VALIDATION (Preceptor, Administrative Supervisor, Department Director Date and Initials)		istrative nt Director,
0	1	2		RD	V	NA
			 i. Prepare appropriate feeding using clean technique. 			
			 j. Assess suck and swallow during nipple feed. 			
			k. Assess infant for distress during feed.			
			1. Assess infant for spitting after feeding.			
			 m. Appropriately document infant's condition prior to feed, feeding type amount, and tolerance. 			
			 n. Demonstrate/verbalize appropriate breastfeeding techniques.
